Premium Grade, Easy-to-Grow
BLUEBERRY PLANTS

by Galletta Brothers

HAMMONTON, N. J.

You'll Enjoy Endless Pleasure in

For Good Eating And Garden Beauty

Almost everybody enjoys the succulent flavor of blueberries. Their distinctive taste whets the appetite. They provide wonderful eating whether served as fruit, as fruit juice, as cooked berries, as berry pie, in muffins and in many other recipes. Yes . . . blueberries are welcome on any menu, at any meal. And anybody with a little ground can easily grow them! Blueberries provide you with more than good eating. After the fruiting season they bring you the added year 'round beauty appeal of the exquisite blueberry bush to delight the eye. The glossy green foliage slowly turns to autumn red; in winter, the wood attains the red and brown of the glorious barberry. Then, with spring these colors give way to the gorgeous clusters of pink buds; these in turn blossom into pinkish-white flower bells before again fruiting.

Heavy Yields of Delicious Fruit

There is almost unbelievable beauty to behold . . . endless pleasure to pick and eat the delicious berries. You can enjoy all of this in your own lawn and garden. As to fruit yield, you may expect 2 to 3 pints of succulent berries from each plant the very first year after setting. Many plants yield as much as twenty pints when fully mature.

Blueberries have come a long way in the last 25 years. The plants form bushes that add color and beauty to the home grounds, especially when used as an informal hedge. And with reasonable care your blueberry plantings may be productive for many years to come.

Blueberries Earn Good Profits

These are reasons why, to-day more than ever before, blueberries are a top favorite too, with commercial growers. They take a first place among the surest source of sales and profits. The demand for berries exceeds the supply. They command top market prices from the canning, bakery and frozen food industries as well as for ever-increasing home use. Whether you have a large farm, a roadside market or are a home gardener it will pay you to plant blueberries.

Easy To Grow

You can successfully grow blueberries anywhere you live—provided your locality has thirty days or more of freezing

Planting GALLETTA Blueberries!

winter temperature. You need only natural or prepared moist, swampy acid soil — with sufficient drainage to prevent surface flooding; in fact on almost any type of soil that will hold moisture (such as clay soil or sandy loam) you can expect success. Your GALLETTA BROTHERS Blueberries may grow where other crops fail! Your local Agricultural Experiment Station can give you the instructions to meet your special requirements. With each order we supply full instructions as recommended by the New Jersey Agricultural Experiment Station.

Headquarters For Success

Remember that unlike most nurseries, GALLETTA BROTHERS specialize in, and grow blueberries exclusively. It is not a sideline with us but our life-work. Every working member of the Galletta organization specializes in the cultivation of superb blueberries. You get the benefit of this highly skilled teamwork—PLUS the extra advantage of obtaining plantings developed in the naturally superior, sandy and acid New Jersey soil. No wonder that people everywhere so highly praise Galletta Brothers blueberries. No wonder too that leading seed and flower companies buy and sell GALLETTA-grown berries . . . and use them as foundation stock. GALLETTA BROTHERS have the largest exclusive

berry farms in the entire State of New Jersey—perhaps the largest in the country. Through constant cooperation with the U.S. Department of Agriculture and State Experimental Stations it is possible to offer exceptionally vigorous and heavy cropping plants.

MAKE YOUR SELECTIONS FROM THESE VARIETIES!

THE BEST FROM THE STANDARD VARIETIES!

WEYMOUTH—(Earliest Known)—Developed on our own farm. Medium upright bush, yielding medium large, dark blueberries. A very heavy cropper and a good commercial variety.

RANCOCAS—(Early Mid-season)—An upright bush. Its outstanding beauty makes it ideal for lawn and garden. It is a fine landscape bush, especially with its beautiful red wood in winter. It is a very heavy producer of good eating—medium size berries.

STANLEY—(Midseason)—Tall, sturdy and fast growing bush. Medium to large light blue berries or very exceptional flavor.

JERSEY—(Mid-season to Late)—Vigorous hardy bush with delightful foliage. Produces large, light blue berries that ship well. A fast growing, good commercial variety. Attractive and very ornamental with large leaves.

DIXI—(Midseason to Late)—A very large and vigorous bush developed on our farm. Ripens just after Jersey. High quality large size, pleasingly aromatic fruit.

PEMBERTON—(Late—Mid-season)—A very fast growing, extremely productive of sweet, dark blue large fruit. Excellent for home gardens.

BURLINGTON—(Very Late)—Extends the blueberry season 5 to 10 days. A sturdy upright bush—noted for its high production of medium size, aromatic berries. An appealing color and firmness are fine dessert qualities. Very good to ship.

WONDEROUS NEW VARIETIES—Originated At Our Weymouth Farms!

EARLIBLUE—(Early)—Ripens a few days after Weymouth. Fruit is large and light blue in color. Better flavored than Weymouth. Excellent for home and commercial use.

BLUERAY—(Early Mid-season)—A very hardy bush producing large light blue berries. Extremely popular because of their interesting flavor. A real gem to plant.

BLUECROP—(Mid-season)—Highly frost resistant. Will consistently overbear. Produces flavorful light blue large berries when heavily pruned. Undoubtedly the most vigorous for northern frosty climates.

BERKELEY—(A Mid-season new variety)—Berries are lighter blue, sweet flavored and larger than any variety now grown. The bush is vigorous, attractive and open spreading. A superior variety for the garden or commercial planting.

COVILLE—(A very late new variety)—Nearly as large as Berkeley. High aroma with a tart, excellent flavor. Fruit does not drop and berries are firm. Excellent for shipping and freezing. The bush is vigorous, open and spreading. This is an all around superior variety.

HERBERT—(Late)—An upright spreading and vigorous bush. A consistent producer of large, dark blue berries of quality flavor. Another gem for the home garden.

FROM A USDA ANNOUNCEMENT

NOTICE TO FRUIT GROWERS AND NURSERYMEN RELATIVE TO NAMING AND RELEASE OF THE COLLINS BLUEBERRY.

The Crops Research Division of the Agricultural Research Service, United States Department of Agriculture, and the New Jersey Agricultural Experiment Station hereby release for propagation a new blueberry variety named "Collins."

Collins ripens midway between Earliblue and Bluecrop, filling the gap in the ripening season of large fruited varieties.

The plants of Collins are erect, vigorous, and moderately productive. The bushes appear to be of the same winter hardiness as Berkeley and Pemberton under normal conditions. The fruit is borne in medium-sized, rather tight, attractive clusters. The berries are as large as Earliblue, firm, light blue in color, and are highly flavored, with sweet to mildly subacid taste. The fruit does not drop nor has it cracked to date.

WHILE THEY LAST!!!

**BLUEBERRY
 RECIPES**

**BLUEBERRY AND
 CRABAPPLE JAM**

- 3 qts. crabapples, chopped
- 1 qt. blueberries
- 6 lbs. sugar.

Cut crabapples in quarters, remove cores but do not pare, put through food chopper, measure, add enough water to almost cover apples, cook 10 minutes, add berries and sugar, let cook until clear; pour into hot glasses; cool, cover with hot paraffine.

BLUEBERRY MUFFINS

- ¼ cup butter
 - ¼ cup sugar
 - 1 egg, well beaten
 - ½ teaspoon salt
 - 4 tps. baking powder
 - 2 cups flour
 - 1 cup milk
 - 1 cup washed blueberries
- Mix ¼ cup of flour with blueberries, let stand 1 hour. Cream butter and sugar, add egg. Sift baking powder, salt and rest of the flour. Combine the 2 mixtures alternately with the milk, add floured berries last. Bake 25 minutes at 425°F. in buttered gem pans.

**OLD FASHIONED
 BLUEBERRY PIE**

- 1 package pie mix
 - 4 cups fresh cultivated blueberries washed and drained
 - 1 cup sugar
 - ¼ cup flour
 - ¼ teaspoon salt
 - 2 tablespoons butter or margarine
 - 1 tablespoon lemon juice
- Roll out half of dough and line 9-inch pie pan. Combine blueberries, sugar, flour and salt. Pour into pastry lined pie pan. Dot with butter. Sprinkle with lemon juice.
- Roll out remaining dough and place over top of berries. Slit top and press edge with fork.
- Bake 15-20 minutes at 450 degrees F. Reduce heat to 350 degrees F. and continue to bake 30 minutes or until crust is golden

The propagation of truly vigorous blueberry bushes requires **naturally** suitable soil and specialized experience and skill. Under such conditions . . . and **only** under such conditions . . . can there be developed bushes that can successfully be transplanted for maximum satisfaction.

Experience proves that you get best results when you buy your plants from **exclusive** berry cultivators. You get these results with **GALLETTA BROTHERS**—who cultivate nothing else. At the Galletta farms blueberries are not a sideline . . . not just **another** item we grow to sell. Blueberry cultivation is our only business—our only interest.

Therefore, why not try some blueberry bushes now and see for yourselves what beauty, pleasure and profit can be attained from them. Remember, also, the price is right and your satisfaction is guaranteed. Buy from
